CMAP region and peer region trends

Major demographic shifts within the region

Like the rest of the country, population is shifting to collar counties

The senior population is already increasing strongly in the north and west suburbs, and is expected to grow region-wide.

The region's older population is growing

In 1970, there a majority of residents were under 35. Today, the region has about the same number of residents under 35 but the number of residents over 35 has increased dramatically.

Number of residents under and over 35, 1970 and 2010-14

👤 = 100,000 residents ● Under 35 ● 35 and over

International immigration has helped the region grow

The region has only seen 14 percent growth in foreign-born residents since 2000. However over the last ten years, the foreign-born population growth was larger than total population growth.

Population growth in foreign-born and non-foreign-born population over time
